Ranking stocks using key chart indicator features

Share Market Toolbox

MA rising

Stage 1 | Stage 2

Robert Brain

September 2017

Price charts summarise the underlying opinions and emotions of the market participants. Every chart tells a story. It pays to understand the stories in the price charts.

MACD (12, 26, 9) −1.5129

−0.7622
−1.513

MACD cross "Above"

About this presentation

Wouldn't it be good if we could take
a list of stocks, and
sort the list so that the
strongest performing stocks (ie. most bullish)
are at the top of the list?

And then invest
in the stocks at the top of the list
in anticipation of the best price performance?

DRAFT ONLY

BUT HOW??

Use T/A indicator observations

We could use observations of
technical analysis chart indicators such as:

- "Moving Average (MA) rising for consecutive bars", especially if it is below the share price.

We might use a 30 week SMA on
weekly chart (á la Stan Weinstein).

This observation is said to be bullish,
and can be readily scanned for
using charting or trading software.
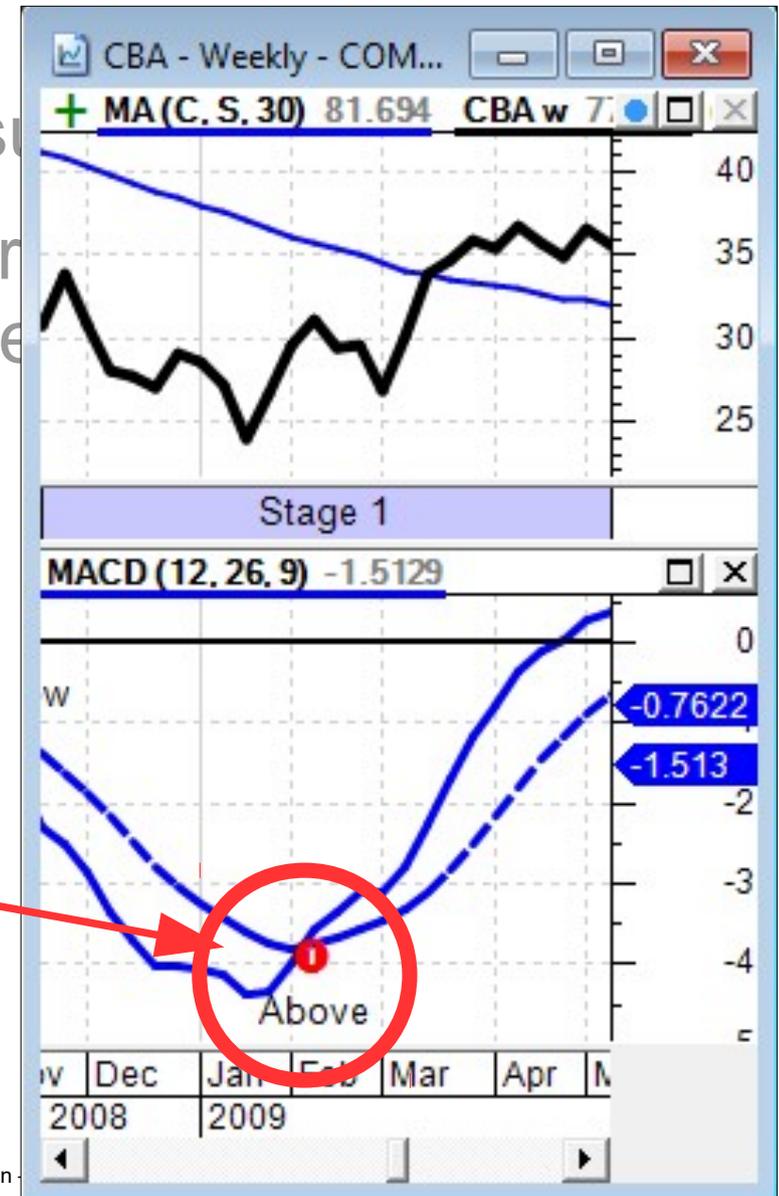

DRAFT ONLY

Use T/A indicator observations

We could use observations of technical analysis chart indicators su

- "Moving Average (MA) rising for especially if it is below the share

What other observations?

- MACD crosses "above" when below its own zero line?

Any others?

DRAFT ONLY

Use T/A indicator observations

We might use observations of
technical analysis chart indicators such as:

- Moving Average (MA) rising for consecutive bars, especially if it is below the share price.

- MACD crosses "above" when below its own zero line.

- Momentum indicator is trending higher (ie. higher peaks and troughs).

- Moving Average of Momentum is above the Momentum and rising.

- Volume is above a Moving Average of Volume.

DRAFT ONLY

About this presentation

Wouldn't it be good if we could take
a list of stocks, and
study key features of chart indicators
to allocate a ranking or score,
then
sort the list so that the
strongest performing stocks (ie. most bullish)
are at the top of the list?
(and the most bearish at the bottom)

DRAFT ONLY

Let's consider how to do this...

Today's Agenda

1. Identify some chart indicators

2. Identify key observations of the chart indicators — prepare a list

3. Consider how to quantify these observations to produce a ranking or score

4. Consider how to automate this.

DRAFT ONLY

Important Notice — No Advice!

- This presentation does not include any advice.

- For proper advice, your personal financial situation needs to be considered.

- This presentation is pure education, only for your general awareness.

- There are no recommendations to take any action, or to invest any money in any way.

- Always consult a properly licensed advisor before making investment decisions.

DRAFT ONLY

Important Notice

DRAFT ONLY

EXAMPLE

Study the following chart and the indicator features ...

DRAFT ONLY

Identify the indicator observations in this price chart.

• HAVROAR

• MACD

• TMF

• Momentum (and its MA)

• MA of price

• Volume (and VMA)

DRAFT ONLY

ALL - Weekly - ARISTOCRAT LEISURE LIMITED
HAVROAR (30, 20, 12000000, 10000000) 33.000
MACD (12, 26, 9) M=0.9089 S=0.6626   MACDH (12, 26, 9) 0.2463
TMF (13) 24.583
m... (Close, 14) 121.677   MS (Close, 14, 14, Simple) 107.663
ALL Weekly   Cl=18.860 O=18.060 H=18.910 L=17.870   7/04/2017
Volume 13,903,587   MA-V (Simple, 5) 11,871,366   MA-V (Simple, 1...

13

Study these bullish features...

We might use observations of
technical analysis chart indicators such as:

(a) Moving Average (MA) rising for consecutive bars,
especially if it is below the share price

(b) MACD crosses "above" when below its own zero line

(c) Momentum indicator is trending higher
(ie. higher peaks and troughs)

(see details on
next slides...)

(d) Moving Average of Momentum is above
the Momentum and rising

(e) ActVest Range+ — indicator cord is rising

DRAFT ONLY

(f) Hull ROAR is rising

(g) Volume is above a Moving Average of Volume.

(a) Moving Average rising...

Moving Average (MA) rising for consecutive bars, especially if it is below the share price.

DOW - Weekly - DOWNER EDI LIMITED
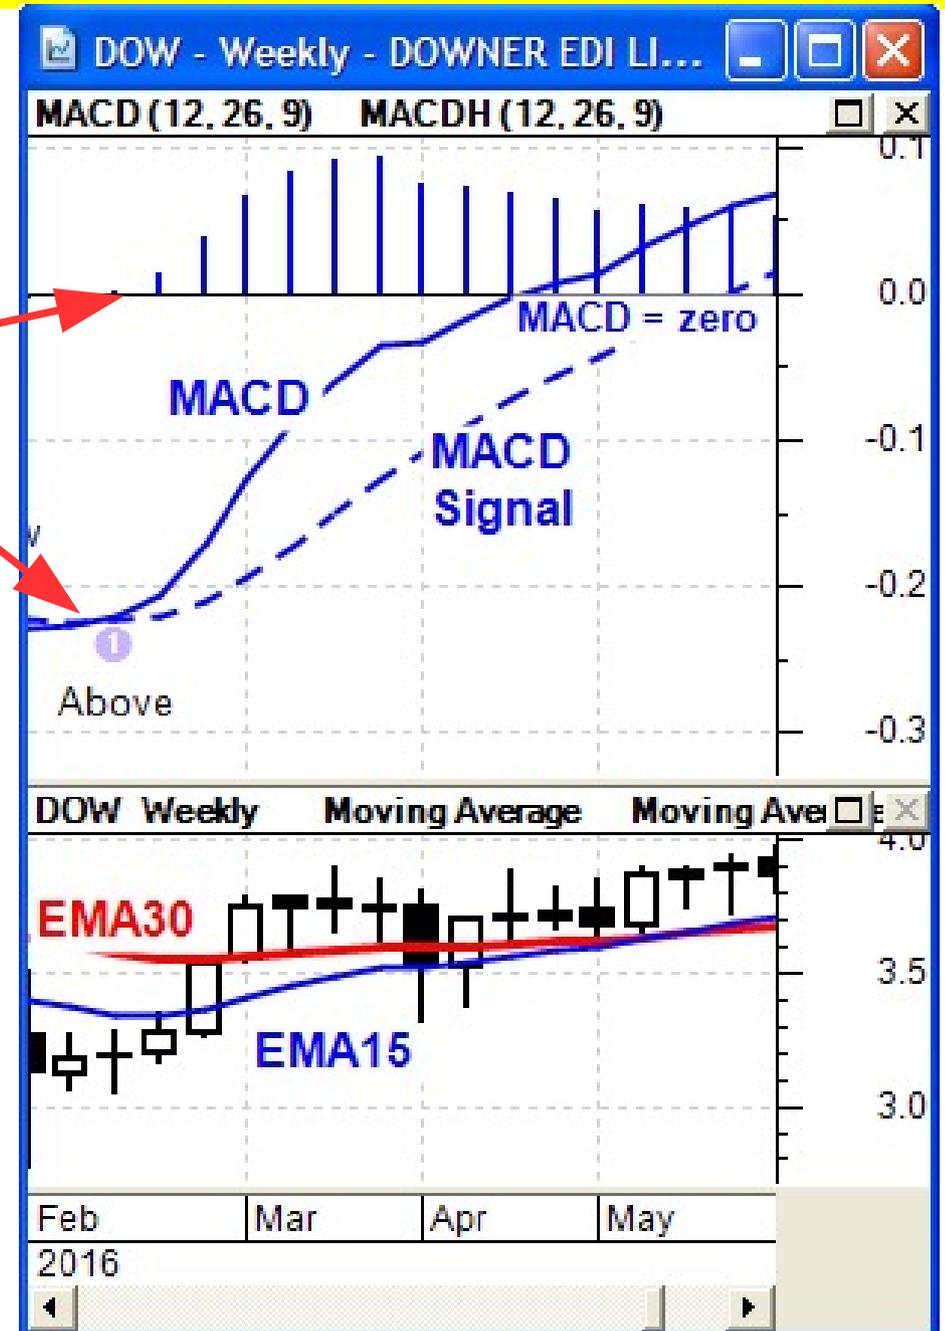

DOW Weekly CI=7.460 O=7.240 H=7.620 L=7.180 +0.260 +3.61% MA (CI 17/03/2017

15 and 30 week MA on a weekly chart

DRAFT ONLY

(b) MACD...

MACD crosses "above"
when below
its own
zero line.

DRAFT ONLY

(c) Momentum...

Momentum indicator is trending higher
(ie. higher peaks
and higher troughs),

AND

(d) MA of MOM is rising.

DRAFT ONLY

DOW - Weekly - DOWNER EDI LIMITED

DOW Weekly   CI=7.460 O=7.240 H=7   17/03/2017

2016

So how to rank the stocks?

Let's allocate a "Score value" for each bullish indicator observation that is true.

DRAFT ONLY

(a) Moving Average rising...

Moving Average (MA) rising for consecutive bars, especially if it is below the share price.

We could allocate a "score"...

| Ref.	Technical analysis indicator observation	Score Value
1	15-week EMA has increased every week for 3 weeks	1
2	30-week EMA has increased every week for 3 weeks	1
3	If EMA (30) has risen every bar for 5 bars	1
4	If EMA (30) has risen every bar for 8 bars	1

DRAFT ONLY

(b) MACD...

MACD crosses "above" when below its own zero line.

We could allocate a "score"...

DOW - Weekly - DOWNER EDI LI...
MACD (12, 26, 9)   MACDH (12, 26, 9)

MACD = zero
MACD
MACD Signal
Above

2016

What about price?

Might it be useful to include an observation of the pure share price?

Ought this sequence of candles be recognised, and classed as "bullish"?

ie. a sequence of Higher Highs, and/or Higher Closes, and/or Higher Lows, etc...

DRAFT ONLY

DOW - Weekly - DOWNER EDI LIMITED
DOW Weekly CI=7.460 O=7.240 H=7.620 L=7.180 +0.260

The Total Score

• Take the individual Scores in
   the previous slides and examples, and
   simply tally them up to arrive at
   the "Total Score" value for each stock.

• For the list of stocks and their own Score values,
   sort the list with the highest scoring stock
   at the top of the list.

**DRAFT
ONLY**

Tally up the scores for this stock

Ref.	Technical analysis indicator observation	Score Value
1	15-week EMA has increased every week for 3 weeks	1
2	30-week EMA has increased every week for 3 weeks	1
3	If EMA (30) has risen every bar for 5 bars	1
4	If EMA (30) has risen every bar for 8 bars	1
5	ActVest ROAR (Rate of Annual Return) greater than 20	(N/A)
6	ActVest ROAR >= previous ActVest ROAR	(N/A)
7	Latest Close >= Previous Close	(N/A)
8	MACD indicator value is less than zero, any bar in the last 8 bars	1
9	MACD has crossed "Above" the signal line, any bar in last 8 bars	1
10	MACD value has increased very bar for 3 bars	1
	TOTAL score (this page):	**7**

DRAFT ONLY

Ref.	Technical analysis indicator observation	Score Value
11	Momentum (14) > the Momentum of any of the last 5 bars	1
12	Momentum(14) has "crossed above" the Moving Average of Momentum for any of the last 5 bars	1
13	Momentum(14) is greater than the Moving Average of Momentum for every bar in the last 3 bars	1
14	The MA of Momentum(14) has increased every bar for the 5 bars	1
15	If Twiggs Money Flow (TMF - 13 period) is now the highest it has been in the last 5 bars	(N/A)
16	If TMF(13) is greater than zero	(N/A)
17	If TMF(13) is greater than TMF(13) for any bar in the last 5 bars	(N/A)
18	If Volume > 5-period Moving Average of Volume	1
19	If Volume > 15-period Moving Average of Volume	1
20	If 8-period MA of Volume has increased every bar for 3 bars	1
	TOTAL score (this page):	7
	TOTAL score (previous page):	7
	TOTAL score:	14

DRAFT ONLY

Might this be useful?

- With careful use of specific chart indicators, might this be a useful approach?

- Which chart indicators to use?

- Can we foresee any issues?

DRAFT
ONLY

Possible PROBLEM!

What if we choose several indicators that are all Trend indicators, or all Momentum indicators?

It is likely that all indicators of a particular type will be bullish together.

Momentum indicators
Momentum
On Balance Volume
RSI

Trend indicators
MA
MACD
ADX

Volume indicators
Volume MA (VMA)
Money Flow
Volume Oscillator

Volatility indicators
Bollinger Bands
ATR

DRAFT ONLY

Another Problem!

In our case study we have listed about 20 criteria. What if:

- If each criteria is allocated one point, and

- Ten of these criteria are all based on observations of **trend indicators**, and

- Five are based on **momentum indicators**, &

- Five are based on **volume observations.**

DRAFT ONLY

Won't this result in a bias towards the trend observations?

A solution to this bias...

- Instead of allocating one point to each observation, we can allocate different amounts (eg. 2 points or 3 points)
  [we refer to this as the "criteria importance"]

- For example, allocate a percentage of the total score to each category (20% each?):

  - Trend
  - Momentum
  - Price

  - Volatility
  - Volume

DRAFT ONLY

What Other Indicators??

What other chart indicators could we use?

1. Stochastic?

2. OBV?

3. RSI?

4. Bollinger Bands?

5. ...

DRAFT ONLY

Some tips

In the examples shown, we have selected parameters which could be tweaked:

1. "periods" for MOM, MA, etc.
   (we used the default value of 14).

2. Scan criteria:- "… if the condition has occurred any time in the last X number of bars".

3. Change the "importance" of each scan criteria.

DRAFT ONLY

How to automate?

Once we decide
which indicators to use,
and which observations
of these indicators to use,
how can we automate the process
of calculating the score
for each stock?

DRAFT ONLY

My favourite...

- In BullCharts software...

- Set up a scan with
  "Match All Criteria" turned off;

- Create the required criteria;

- Then set "Importance" and "Required" options
  for each scan criteria.

Scan Criteria: ☐ Match All Criteria

Criteria	Importance	Required	^
☑ Open is greater than or equal to previous Open every bar for the last 3 bars.	1	No	
☑ Close is greater than or equal to previous Close every bar for the last 3 bars.	1	No	
☑ 30 bar exponential MA of Close has increased every bar for the last 5 bars.	2	No	
☑ 30 bar exponential MA of Close has increased every bar for the last 8 bars.	2	No	
☑ MACD (12, 26, 9) is less than 0 any bar in the last 8 bars.	2	No	
☑ MACD (12, 26, 9) Above is true any bar in the last 8 bars.	2	No	

DRAFT ONLY

Useful?

Might this approach be useful
to rank a list of stocks
in order of bullishness?
and

likelihood to perform?

DRAFT ONLY

Ranking stocks — chart indicators

Key observations
of chart indicators
can be used to
produce a ranked
list of stocks.
