### BY THE NUMBERS

Des Bleakley - BullCharts User Group

Wed 21th Feb 2018

#### **AGENDA**

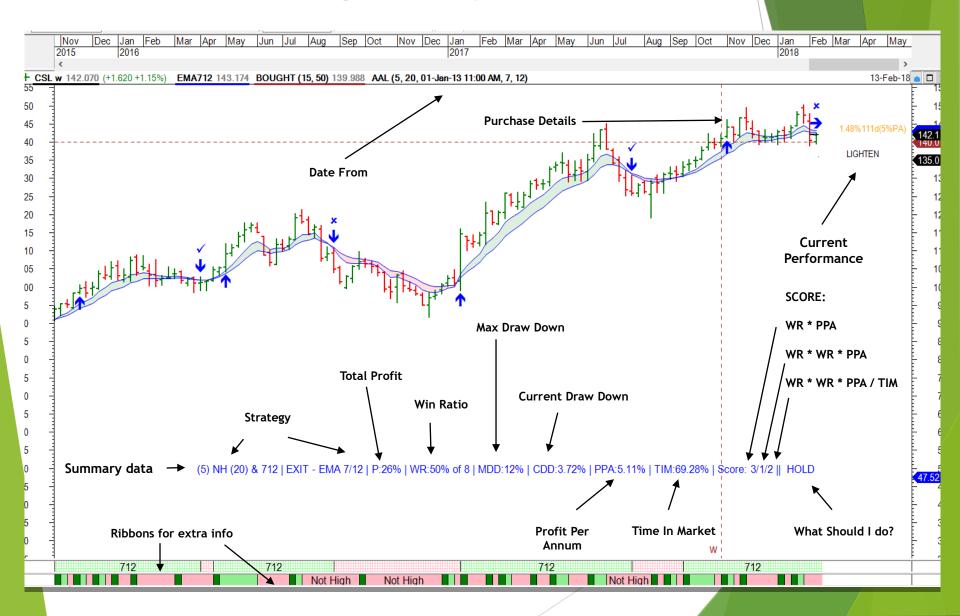

#### PROFITABLE!

- Find Strategies to Trade Stocks
- Minimise Subjectivity where possible
- Automate less time / less effort
- Measurable
- In practice?
- Examples & Questions

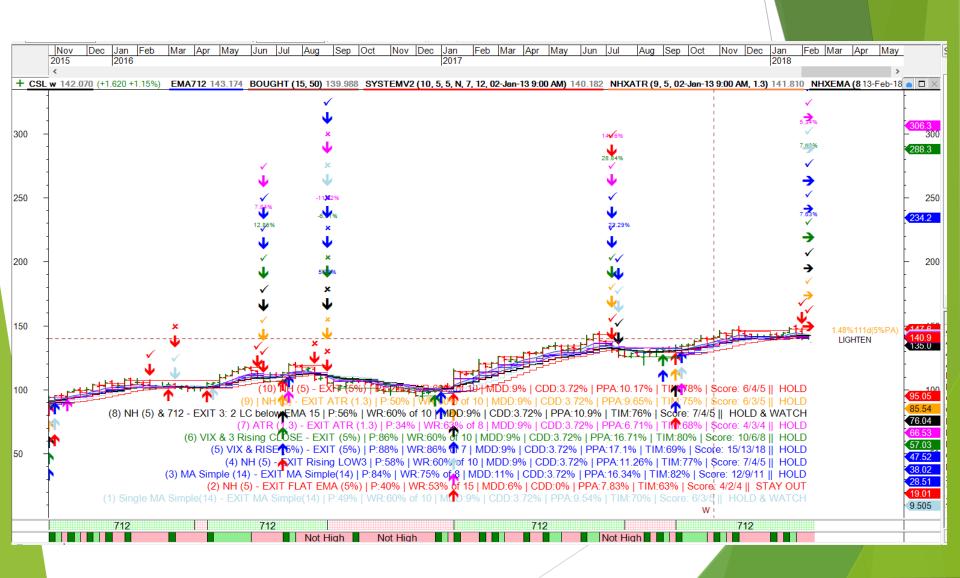

### FINDING STRATEGIES

- Trend Trading is my preference
- NIRVANA Do not search for optimal strategy for all stocks "Holy Grail"
- Find OK strategy & select stocks that work within that
- Do not allow the search for perfection to destroy the good
- Build on previous strategies
  - Up trending
  - New High Entry
  - ► MA crossover (7 / 12 )
  - Mix & Match & Compare
  - Play with parameters

#### **Example - Layout**

#### Can Get Very Busy!

### **Principals**

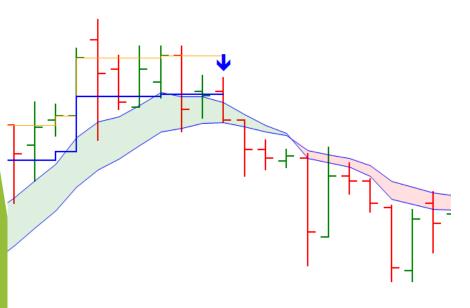

- Find trending Stocks (WMD)
  - Monthly 7 on 12 uptrend
  - Weekly 7 on 12 uptrend
  - Daily 7 on 12 uptrend
- Pick a Strategy
- Plot entry & exit points
- Calculate statistics
  - Win / loss rates
  - Cumulative \$ performance
  - Draw Down
  - Time in market
- Look at the numbers

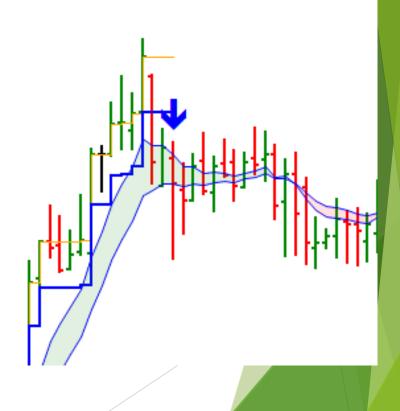

#### **Better Exits**

- Moving Average Crossovers
  - Can be later than you like
  - Often give a lot back
  - Slow to react on many occasions
- Limit "give back" pain
- Use a Trailing Stop Loss
  - Relative to highest gain
  - Set stop loss below high point at a percentage you are comfortable with
  - Two lower stops works much better (IMHO)
  - If you choose 5% it really is more like 10%
  - OR ATR OR Rising Close OR FLAT MA OR . . .

### **EXITS - MA Crossover is too late**

► 5% TS exits before 7/12 MA

### Possible Entry / Exit Methods

#### **ENTRY**

- New High which period?
- Close above a MA which MA OHLC?
- Rising Closes
- Close above ATR parameters?
- Entry filter (VIX) OR HULL OR . . . .

#### **EXIT**

- MA Crossover which ones?
- Trailing Stop Lots to choose % / ATR / PSAR
  - How many closes before exit?
- MA Flattens how much & which MA
- AND ALL POSSIBLE COMBINATIONS

### New High Entry 52 / 20 / 5 Weeks

(+44.200 +0.74%) SYSTEM (20, 5, 0, 12, 0, 5) 6,122.3 SYSTEM (5, 5, 0, 12, 0, 5) 6,122.3 SYSTEM (52, 5, 0, 12, 0, 5) 6,122.3

### Comparing strategies & stocks?

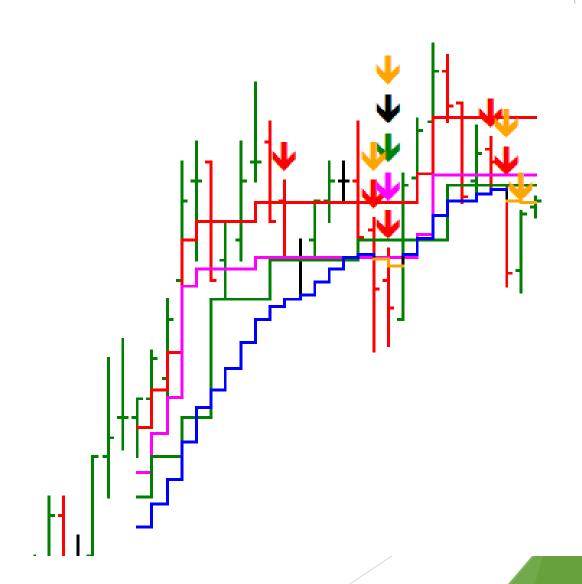

- Decide on strategy / strategies
- How much data to look back upon?
  - 5 years in these examples
- Apply & Calculate Profit across trades
  - ► Total Profit
  - Profit Per Annum (PPA)
  - ► Time In Trade (TIM)
- Win / Loss Ratio
- Maximum Draw Down
- Create a Score which one(s)?
  - Consider "sleep factor" x Profit
  - ► I like Win Ratio x PPA TIM useful?
- Compare the results but beware of tyranny of small numbers

#### Possible exits?

- ► Stop Loss x%
- ATR n
- MA crossover
- Close below MA
- Flat EMA
- Rising Low stop
- Effect on draw Down

Let's have a look

### Trailing Stops - how different?

## Example 0 New High Entry 52 - Exit 7/12 Crossover (Peter Castle)

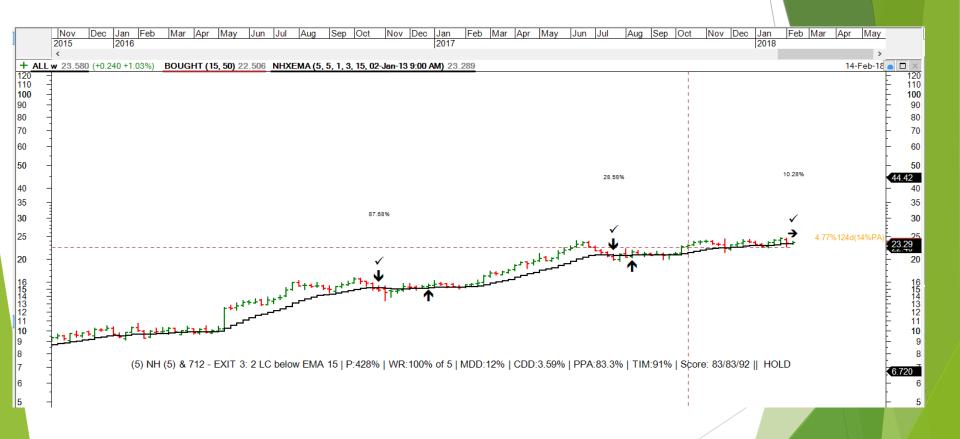

## Example 1 New High Entry 5 - S/L 5% from high

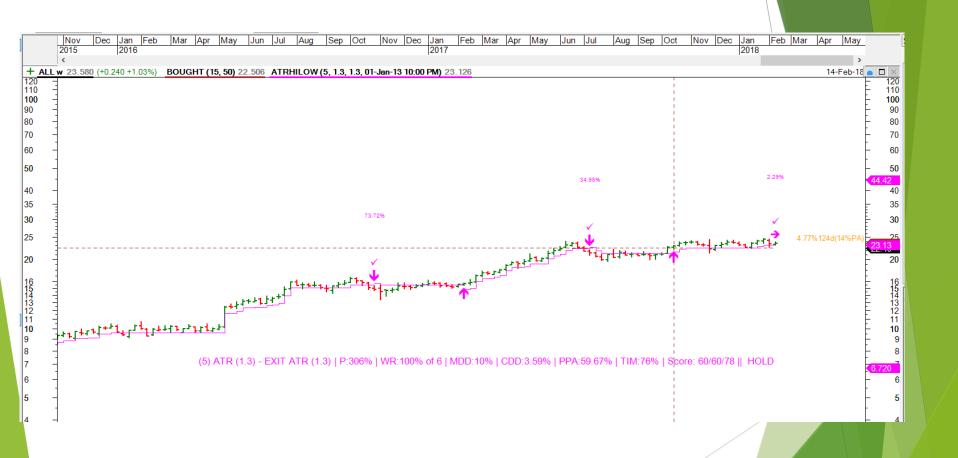

# Example 2 New High Entry 5 - S/L 1.3 ATR

# Example 3 New High Entry 5 - S/L EMA 15

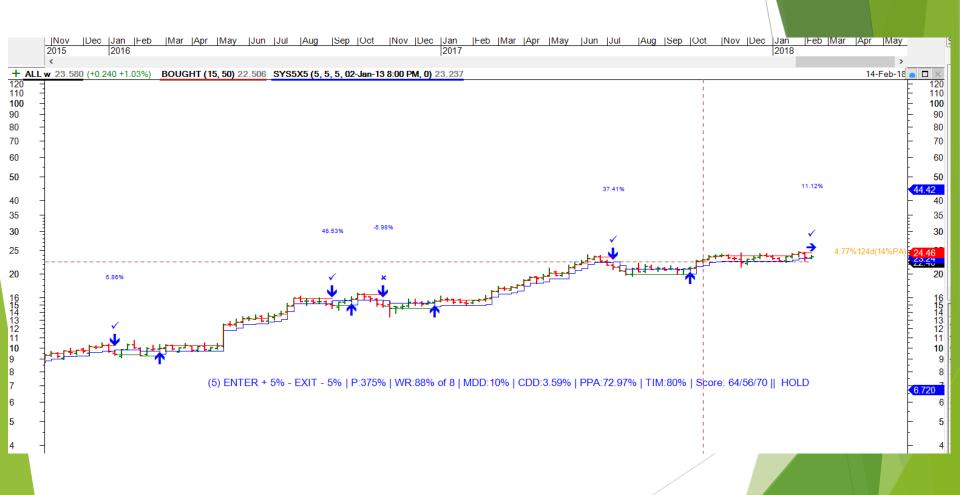

# Example 4 Entry 1.3 ATR - Exit 1.3 ATR

## Example 5 Entry High Close 3 - Exit S/L 5% from High

# Example 6 Entry +5% Rising from Low - Exit S/L 5% from High

# Example 7 Entry New High 5 - Exit Rising Low 3

# Example 8 Entry High Close 3 - Exit Rising Low 3

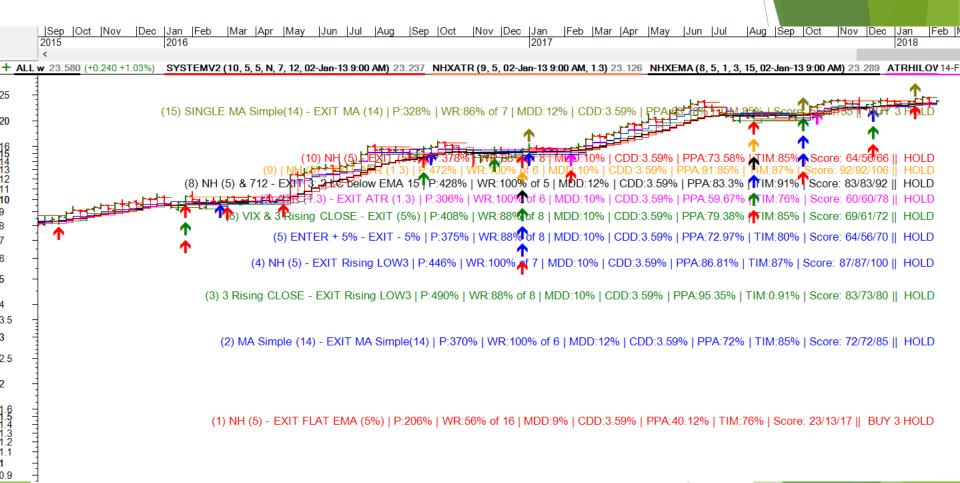

### Example 9 (very simple) Entry above SMA(C)14 - Exit Below SMA(C)14

# Example 10 (very simple) Entry above SMA(L)14 - Exit Below SMA(C)14 Small change - big difference - mmmm?

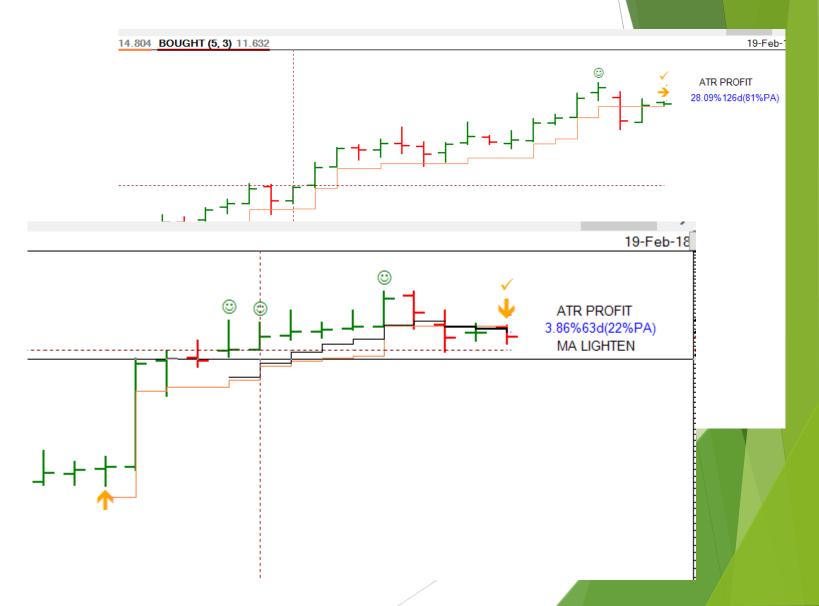

#### TAKE YOUR PICK

### **Soft Exits**

- If you wait for Hard Exit, you often give a lot back
- ▶ Look to anticipate when momentum lessens
- ▶ Take profit before you are forced to exit
- Watch for Close above 3xATR topping behaviour?
- AND / OR FLAT EMA

### **Profit Take Advisory**

### Putting it together - my way

- Select a strategy of your choice
- Scan for up trending stocks on WMD timeframes
- Scan for stocks that fit this chosen strategy
- Do the numbers and compare scores
- Look for stocks which have just generated an entry signal (in past couple of weeks I use 5 periods)
- Select & Buy look at Soft Exit Signal
- Monitor for exit (Indicator gives instruction)

#### **SUMMARY**

- ▶This methodology helps me
- More back testing can be done
- More strategies to explore your thoughts
- ▶ Please tell me parameters that work best for you
- All Bull Chart script freely available
  - Email me des@bleakley.com.au
