John Beattie

My approach to analysing the market

John Beattie's presentation to the BCUG webinar 24 June 2020

Today's topics

John Beattie will show several price charts and lead Q&A:

- VSA (Volume Spread Analysis) a quick intro, and then some examples.
- Using Gann and Elliott Wave some real examples.
- Including: Custom indicator ("JM" based on MACD);
 BC useful text boxes, channels, uptrends, cycles,
 chart patterns (eg. double bottom),
 Wyckoff (eg. "springs", "jump the creek").

One should always seek professional advice before entering into financial or other arrangements.

John's "JM indicator"

John referred to his "JM indicator" which is simply a modified MACD:

It is simply the regular MACD but with a revised set of input parameters.

Instead of the standard: 12, 26, 9 John uses: 8, 16, 9 so that the MACD behaves "faster".

VSA (Volume Spread Analysis)

John utilises some of the concepts of VSA in his daily chart analysis, and briefly elaborated on this in his discussion.

There is some specialist software for use in VSA analysis. For more details on this topic refer to: www.tradeguider.com

VSA (Volume Spread Analysis)

David Woodside has found a BullCharts indicator titled: "Volume Spread Analysis Colour Volume Bars", which he has sent to us after the meeting.

This indicator comprises thick volume bars that are coloured depending on the VSA circumstances.

(You can download the .bss file here)

(We are not sure of the original author of this indicator).

Hand over to John Beattie...

Over to John...

There is a sample of one of John's charts on the next slide.../
