Introduction

The BullCharts charting software is probably well known for its ability to easily produce and analyse price charts for Australian stocks and indexes. But there is a lot of additional information that is also available. The additional information includes security-specific details, as well as various tools and reports for the whole of the market.

An introduction to the list of features in BullCharts is included in Brainy's Article BC-02-100, "BullCharts — Product Overview". This Article BC-02-120, "BullCharts — Market views, maps, scans", briefly describes the additional whole-of-market tools and reports that are included in the product.

Market views, maps, scans

The BullCharts software includes a number of market-related tools and reports. These are available under the menu option: *Actions > Market View*. They are listed below with brief descriptions and sample screen shots. Unless indicated otherwise, all of these tools and reports are available with the basic End-of-Day data plan. Note that some of these rely on data to be pulled down over the internet from the BullCharts servers (in Sydney), so there can be momentary delays as with any web-based application.

- Market Scan report** — A tool to scan the market and list instruments that meet certain criteria and then display latest performance data. The available instruments to search include: basic stocks, equities, options or warrants. There is a "where" drop-down box with a long list of selection criteria to choose from, and drop-downs for selecting a date range and other options. There is also an option to readily sort the list. The on-screen results display: Last price, Volume, Trades, whether up or down, and percent change.
- Indices report** — A summary list showing the performance of the indices — their movement since market open, and their most recent value. You can also drill through to reveal the composition of each Index.

Symbol	Company Name	Last	Volume	Trades	% Chg. (Close)	+/- Chg. (Close)	
EMM	ELECTROMET FPO	0.020	400,000	2	↑ 53.85%	↑ 0.007	chart watchlist(+) i-chart

- **52 Week High/Low report** (sample at right) — A summary list of stocks making New 52-week Lows and new 52-week Highs during today and the previous four trading days.

New 52 week Lows				
Symbol	Company	New Low	Old Low	Last Price
ACK	AUSTOCK FPO	0.135	0.140	0.135
AFV	AURORAFUND FPO	1.560	1.750	1.560
BOD	BIOMD LTD FPO	0.020	0.022	0.020
DOM	DOMINION FPO	2.120	2.130	2.130
EHR	EARTH HEAT CDI	0.024	0.032	0.030
EQT	EQUITY.TR. FPO	14.650	14.670	14.740
GFF	GOODMAN FPO	1.275	1.300	1.290
GIA	GIACONDA FPO	0.027	0.029	0.030
HEG	HILL END FPO	0.085	0.087	0.085
KRB	KRUCIBLE FPO	0.235	0.240	0.250
MOY	MILLENNIUM FPO	0.022	0.023	0.023
NLB	NULLARBOR FPO	0.260	0.270	0.260
SHH	SHREE MIN FPO	0.092	0.095	0.092

New 52 week Highs				
Symbol	Company	New High	Old High	Last Price
ABC	ADEL BRTN FPO	3.350	3.200	3.150
AEC	AMMTEC FPO	3.700	3.610	3.680
AFIN	AUS.FOUND. NEW	4.800	4.750	4.800
ANZPA	ANZ BANK PREF	104.500	104.450	104.199
AUC	AUSGOLD FPO	0.285	0.270	0.275

- **Pre-Open Alert report** (sample below) — A summary list of the stocks whose Indicative Price is most above their previous closing price — shows the indicative price, and surplus volume amount. This is useful before the market opens, as it indicates stocks whose prices are likely to increase dramatically when the market opens.

Symbol	Company	Movement (Indicative - Last)	Indicative	Last	Surplus Volume
NST	NTH STAR FPO	3.45% ↑ 0.002	0.060	0.058	-331,107
PTN	PRIMETRUST UNITS	2.08% ↑ 0.001	0.049	0.048	186,880
LNC	LINC ENRGY FPO	1.08% ↑ 0.020	1.880	1.860	-8,169
GGE	GRAND GULF FPO	0.00% 0.000	0.020	0.020	-137,000
PYC	PHYLOGICA FPO	0.00% 0.000	0.084	0.084	-54,832
SSN	SAMSON FPO	0.00% 0.000	0.075	0.075	188,250

- **Market Summary report** — Shows information on market activity during the current trading day. It is organised into four different sections, including a market overview, as well as volume, value and trades information.

Market Overview			
Market	Volume	Value	Trades
Stocks	2,253,480,959	5,009,262,002	499,431

- **Market Map** — The Market Map is a graphical tool that indicates price movement as well as one other piece of data from volume, sales, trades or market capitalisation over the entire market. The Market Map is comprised of rectangular cells of various sizes, each representing an individual company or industry sector.

- **Market Scatter** — The Market Scatter is a graphical tool that plots all of the securities in the market based on two security-specific parameters that you specify.

You can select any two values using the “X-Axis” and the “Y-Axis” drop-down boxes — such as Last Price, and a fundamental parameter like PE Ratio. In the sample below, Market Cap is shown across the horizontal X-axis, and Volume is shown up the vertical Y-axis.

Each security appears as a coloured point on the chart, with its location depending on the two values. For some values a log scale will automatically be used. Security information can be seen by hovering the mouse over a point, or clicking on it. The colour of points can also be used to represent information such as industry group or price movement. You can use the Market Scatter tool to visually search for companies with strong fundamentals, or to compare the relationships between different values.

There is a link on the chart (to the right) to “Learn more about the scatter chart”.

- Market Pyramid** — The Market Pyramid is a graphical tool made up of cells that represent industry sub groups. The cells are colour coded either green or red, and compiled into a pyramid that indicates the industry sub groups that have experienced the greatest price movement today. The sub-groups at the top and bottom of the pyramid are represented in the darkest colours and have experienced the greatest price movement. The ones in the centre are represented in lighter colours, and have experienced smaller price movements.

- GICS Sectors report** — This report lists the best performing securities for a specific industry group. It is useful in either gaining a list of the companies within a sector, or for determining the largest movers within a sector during the current or previous trading days.

GICS Sectors
