

Brainy's Trading News and BullCharts Tips

Introduction — What's included?

Newsletter
Introduction

October 2008

What is Brainy's new monthly "Trading News and BullCharts Tips e-Newsletter" all about?

Well, it is actually a whole package of information, aimed at both new and experienced traders and investors.

What does the total package include?

Information in separate documents or articles on each of the following subjects:

- Share Trading
- Technical Analysis
- BullCharts tips and various "How To" information
- BullCharts Indicators & Scans

Each document is up to four pages long, and has a special reference code in the top right-hand corner. You can print the documents and file them in a binder using the special reference code to file them in sequence.

And I periodically provide an updated Table of Contents for each subject to help you find material as it accumulates.

How does this work?

Each month I can send you an email with information like what's on this page. It will provide an overview of the topics covered this month. It will also include an internet link to a web page so you can download each of the month's articles at your leisure — when it suits you.

Investor? or Trader?

There is information here to suit both. Even retired people with a nest egg of superannuation or shares.

Over the long term, if you can avoid the severe falls in the bear markets, you can reduce any losses.

BullCharts Tips & Topics

The monthly documents on this topic will over time result in a mini handbook of how to use many of the features in BullCharts.

And it will supplement the existing BullCharts documentation.

To see the list of FREE articles available this month, and the links to download them, just visit my web site: www.robertbrain.com

Share Trading Topics

People new to share trading need to be careful not to lose their hard earned dough. I cover various topics to do with share trading to help you get started on the right track (like what is in my Boot Camp seminar).

For the more experienced traders, I cover topics like position sizing, money management, trading psychology, emotion, risk management, and stop loss setting.

Technical Analysis topics

Let's not kid ourselves. The subject of technical analysis is a very broad and complex one. Anyone who is fairly new to this subject might be easily overwhelmed as they start to see the large variety of detail.

In my monthly articles I provide both a good introduction to technical analysis and its various aspects, and also cover a number of topics in much more detail.

BullCharts Indicators

The BullCharts charting and trading software package includes more than 200 indicators! And, there is a large number of ways in which they can be easily customised.

New BullCharts users always seem to look for help with coming to grips with both the variety of indicators, and the technical analysis theory behind them. All this is covered in my monthly articles.

BullCharts Scans

The BullCharts software includes a great scan feature. It is both feature-rich and powerful, and also easy to use at a basic level.

After BullCharts users have used the basic features in the scanning module, it is useful to start exploring the extra features to get a whole lot more out of the scans.

This is covered in my monthly articles. Starting with basic use, and also covering advanced Bulls-can features.

Why BullCharts?

I reviewed the available charting software packages in 2005, and I chose BullCharts as my charting package of choice. My reasons for choosing BullCharts are [listed on my web site](#).

What is BullCharts?

The official [BullCharts web site](#) says: "*BullCharts is an innovative charting and technical analysis system. It provides a feature rich and powerful set of tools with access to the latest strategies from local and overseas authors in analysing the dynamics of the stock market.*"

You need to subscribe?

Unfortunately, it is not possible to provide all this information for free. It takes quite a while to put it together, plus specialised knowledge of the topic, as well as the ability to package it up into a useful and easy-to-read format.

To receive the e-Newsletter package each month you need to subscribe. Good news? The rates are very reasonable.

Not convinced?

Great value for money! Better than buying another text book that you might not find time to read.

Feel free to visit my web site to see some samples, download all the freebies, and review the subscription options.

Successful investing,

Robert Brain

Other special offers:

"Share Market Boot Camp" seminars and "Introduction to Technical Analysis" seminars running bi-monthly in Melbourne. Get in early to avoid disappointment. See the web site for details.
