Introduction

The BullCharts software incorporates the concept of *Author Strategies*. These strategies have been developed by influential authors and active traders and are implemented in BullCharts in scans, technical indicators and templates. More details about the concept of Author Strategies are included in Brainy's single-page and free article number BC-26-050, "*Author Strategies — What are they?*".

Some of the Author Strategies included in BullCharts are attributable to Alan Hull. This article in Brainy's series on BullCharts (number BC-26-200) focuses on his strategies, and firstly lists the related scans, indicators and templates (in the table below), and then provides more information on some. This BullCharts article is a good overview of the way in which BullCharts implements Alan's key strategies, to help you on the road to understanding and implementing them using BullCharts.

For more background information about Alan Hull, including his published books and newsletters, see Brainy's Share Trading article number ST-6420, "*Sample trading strategies — Alan Hull*". The reader is strongly encouraged to also refer to Alan's web site www.alanhull.com.

CAUTION

Investing in the stock market can result in loss of funds. This document is not advice and does not recommend that you follow any strategy described herein. Do proceed with caution.

Background information

For some good background information on the principles and concepts in this article, also refer to the following articles in Brainy's series:

- ST-6400 — "*Sample trading strategies — Introduction*". A **word of warning** about adopting anyone else's trading strategy, and about the need for adequate back testing.
- ST-6420 — "*Sample trading strategies — Alan Hull*". Includes an introduction to the teachings of Alan Hull from a Share Trading point of view.
- TA-6150 — "*Alan Hull — MMA, Range, ROAR*". Some introductory information about the technical aspects of Alan's Multiple Moving Average (MMA), Range, and ROAR indicators.
