(Revision 13c)
The Handout NOTES

This is the set of Handout Notes for this presentation.

Each page contains a presentation slide in the upper half, and supporting comments and notes in the lower half of the page.

Agenda:

- The GFC — What actually happened?
- What did this do to our investments? How badly can a bear market treat us? See the damage to a typical \$100,000 portfolio.
- Is there an alternative? Should we hold onto our shares through the roller coaster ride or cleverly liquidate?

This presentation has been delivered to a number of groups since November 2010, and has been revised, massaged and split into two to produce the current version.
